# CLIMATE CHANGE POLITICS IN EUROPE

## Germany and the International Relations of the Environment

By Lyn Jaggard

In the 21st century the climate change debate is increasingly moving up the agenda. In this topical book Lyn Jaggard evaluates the role of ideas in the evolution of the politics of climate change. She investigates the evolution of climate change policy in the European Union and specifically Germany's role in the international relations of climate change. Jaggard argues that Germany's federal system has facilitated the political mainstreaming of popular environmental concerns which has led to the development of effective environmental domestic and foreign policy-making, influencing both European and wider climate change policy.

'...not only provides an extremely insightful view into the workings of climate change international relations of Germany and the EU, it also provides a way forward for research and for future policy-making in an important field of nature-society interactions.' - Dr Udo Simonis, Professor of Environmental Policy, Wissenschaftszentrum Berlin fur Sozialforschung

'...a welcome and impressive piece of work. It bridges a gap between texts that tend to focus solely on very specific environmental issues and those that look more generally at foreign policy analysis. It also covers a wide range of topics that should lead to an equally wide readership.' - Dr Roy Smith, Nottingham Trent University

Lyn Jaggard is a visiting researcher at the University of Birmingham studying climate change related politics and international relations. She has lectured at Oxford Brookes University and at the University of Greenwich.

**Special Offer Price £36.75** RRP ~~£52.50~~
